

SERIES FIXED LOUVRE DESIGN

The E Series is available as a stand-alone full chevron louvre system or as a second-stage addition to our other louvre series. This allows you to eliminate the entry of wind-driven rain and therefore ensure total weather protection while not impacting on your project visually.

Our ability to mount the blades horizontally or vertically when used as a stand-alone louvre ensures that the **E Series** is the visually ideal solution for privacy screening in apartment buildings or screening of unsightly plant and equipment.

- Maximum blade span: 1800mm
- 42% free open area – second stage louvre
- 48.5% free open area – full chevron louvre

Want to know more? Ask us for the **E Series** Data Sheet or let our design team advise you on the best ideas for your project.

Second Stage Louvre Typical Application
